Meanwhile Calypso, the lovely goddess, brought him drills, and he bored through the timbers they joined them, hammering the mortice and tenon joints together. Odysseus made his raft as wide as a skilled shipwright makes the hull of a broad-bottomed trading vessel. And he placed the decking, bolting the planks to the close-set timbers as he worked, completing the raft with long gunwales. He fixed up a mast and yardarm, and a steering oar for a rudder. Then he lined its sides from stern to stern with intertwined willows, as a defense against the sea, and covered the deck with brushwood. Meanwhile Calypso, the lovely goddess, had brought him the cloth for a sail, and he skillfully fashioned that too. Then he lashed the braces, halyards and sheets in place, and levered it down to the shining sea.	Bk V:192-261

There is a time to sleep, and a time to delight in hearing a story. No need for you to sleep before you are ready: too much sleep can even weary us. As for you others, if anyone has a mind to rest, let him do so outside, and breakfast at dawn, and follow our master's swine, but we two will eat and drink here in the hut, and savor each other's memories of trouble and sadness, for a man who has suffered deeply and travelled far relishes even his sufferings in after days. Let me tell you, then, the answers to your questions.' Eumaeus's Story. The sun dipped and the streets grew dark. We hurried down to the fine harbor, where the Phoenicians' swift vessel waited. They embarked, taking us on board as well, and sailed away over the sea, on a favorable wind from Zeus. And the porch and the court are filled with ghosts, ghosts hurrying to Hell Erebus by night: the sun has vanished from the sky, and a foul mist blankets all.'
